

Machine and plant construction for the paint-, lacquer and building chemical industry

Berg industry agency plans and provides with their partners, machines and plants for the chemical industry. Our products ranges from raw material handling, dosing, filtration and production to filling and palletizing. Our machines and plants are well-known for their customized, project-oriented and solid execution.

This overview of our working fields for the paint-, lacquer and building chemical industry, should give you a first impression of our wide production programme. We provide leaflets and dimension sheets for further details.

Filter technology

- Pail destacker
- Drum and container filling
- Lid positioner
- Pail sealing
- Palettizing machines

Mixing technology

- Agitator and vessel
- Powder mixer

Dosing technology

- Raw material dosing systems
- Additive dosing systems
- Pigment paste dosing systems
- Powder dosing systems

Produktionsanlagen

- Tank top
- Pig techniques
- Plant hygiene

Powder Handling

- Silo storage and discharge
- Bag and big-bag handling
- Small component handling
- Powder container
- Dust filter
- Cyclone
- Screw conveyor
- Pneumatic conveying systems

Cleaning machines

Filtration plants

Liquid waste conditioning plants
